SINDARAM SAATHWIK

AI/ML Student | Aspiring to be a Software Engineer

saathwikreddysindarm@gmail.com | 8309202816

Address: 7-90, Gandhi statue, Pipri, Armoor, Nizamabad, Telangana, India ,503224

PROFILE

B-Tech Artificial Intelligence and Machine Learning student at VNR Vignana Jyothi Institute of Engineering and Technology with a strong interest in Artificial Intelligence, Machine Learning, software development, and problem solving. Experienced in developing machine learning, web-based, and hardware-based projects, including water turbidity prediction, software bug tracking, smart energy monitoring. Familiar with Python, Java, C, and data-driven problem solving.

EDUCATION

VNR Vignana Jyothi Institute of Engineering and Technology (VNRVJIET)
B.Tech – Artificial Intelligence and Machine Learning | 2025–2029 | Hyderabad

Sri Chaitanya Junior College
Intermediate | **98.0%** | 2023–2025

Sri Chaitanya CBSE School
CBSE | **443/500** | 2022–2023

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, C
Machine Learning: XGBoost, Anomaly Detection(beginner)
Web Development: JavaScript(beginner)
Tools: GitHub, Google Colab
Areas of Interest: Artificial Intelligence, Machine Learning, Software Development

PROJECT

Resume Skill Gap Analyzer

JavaScript | XGBoost | Resume Dataset

- Developed a web application for analysing resumes and identifying potential skill gaps.
- Used a resume dataset with **XGBoost-based analysis** to identify skills that may be missing or insufficient for a target role.
- Designed the application to provide users with insights into areas for improvement in their resumes and skill sets.

PrintAI — Smart Printing Assistance System

Web Development | AI | Design Thinking

- Designed a smart printing platform that allows students to upload documents before visiting a stationery shop.
- Designed the system to reduce waiting time and avoid rush at stationery shops, especially during assignment and submission periods.
- Integrated AI-based ideas into the platform to improve the overall user experience.

Water Turbidity Prediction Using Machine Learning

Python | CatBoost | Machine Learning | Time-Series Data

- Developed a machine learning system to predict water turbidity levels using historical water-quality data.
- Applied machine learning techniques with time-based validation to handle changes in water-quality patterns over different years.
- Built the solution to support turbidity estimation for future water-quality monitoring.

ACHIEVEMENTS

- 3rd place and won cash prize of 3000 in the ML challenge event
- District-level Champion in Abacus.
- Participated in coding competitions and technical events to enhance problem-solving skills.
- Winner in Inter-School Cricket Tournament.

LANGUAGES

English | Telugu | Hindi
